SUMMARY

XR technologist and problem solver with 8 years at the intersection of enterprise challenges and immersive technology. Not a pure developer a builder who digs into business problems, conceptualises XR-first approaches, and drives them from whiteboard to production. Background spans semiconductor manufacturing, automotive, medical, and defense. Comfortable owning ambiguous problems end-to-end: from identifying high-value use cases to shaping interaction design, coordinating cross-functional teams, and delivering measurable outcomes.

EXPERIENCE

Associate Technical Lead XR | Applied Materials | Jan 2025 Present

- Define XR strategy across 3 business units; 200+ engineers using VR design review for cross-site collaboration
- Shaped interaction design and UX approach for 2 BU-funded XR initiatives targeting first-time device users
- Drive XR adoption: trained 200+ engineers on HoloLens and VR workflows across India manufacturing sites
- Built AI-assisted automation tooling (mesh optimisation, content pipelines) using Blender, Pixyz, Claude, Copilot
- Own usage analytics for XR training applications: 500+ MAU, dashboards, insight reporting to leadership

Senior Software Engineer XR | Applied Materials | Oct 2021 Dec 2024

- Identified and solved high-friction 3D content bottleneck automated CAD-to-XR pipeline, 60% faster prep
- Deployed HoloLens Remote Assistance across India workforce; eliminated international travel for on-site support
- Led AR Quality Inspection rollout at Singapore plant 30% reduction in inspection cycle time
- Delivered 10+ production XR applications across training, inspection, and remote assistance workflows
- Managed vendor XR software deployments end-to-end: procurement, QA automation, release migration

Senior Engineer XR | L&T Technology Services | Oct 2017 Oct 2021

- Full ownership of 30+ XR POCs across 6 verticals: problem framing, scoping, estimation, budgeting, hardware sourcing, client demos, stakeholder updates
 - 5 enterprise applications taken to production; recovered 3 high-risk projects through architecture redesign
 - Grew XR team from 7 to 9; led as senior; managed client relationships and scope changes independently
 - Won LTTS JustCode Hackathon 2018 | Finalist, Motorola Transform the Smartphone Challenge 2018
-

SKILLS

Unity 3D · Unreal Engine · Meta XR SDK · ARCore · ARKit · Vuforia · MRTK · HoloLens · OpenXR
Blender · Pixyz · Simplygon · Python · C# · JavaScript · Git · CI/CD
Problem framing · XR interaction design · Stakeholder engagement · Hardware procurement · Usage analytics

EDUCATION & CERTIFICATIONS

B.E. Electrical & Electronics Sapthagiri College of Engineering, VTU | 2017
PTC Vuforia Developer Fundamentals | Agentic AI Certification (in progress)
